

**Service wrench provided
Tighten when leaking?**

**When CSST is used
Manufacturer's nail plate is required**

**Proper nail plates required at
penetration of framing members
for top and bottom plates**

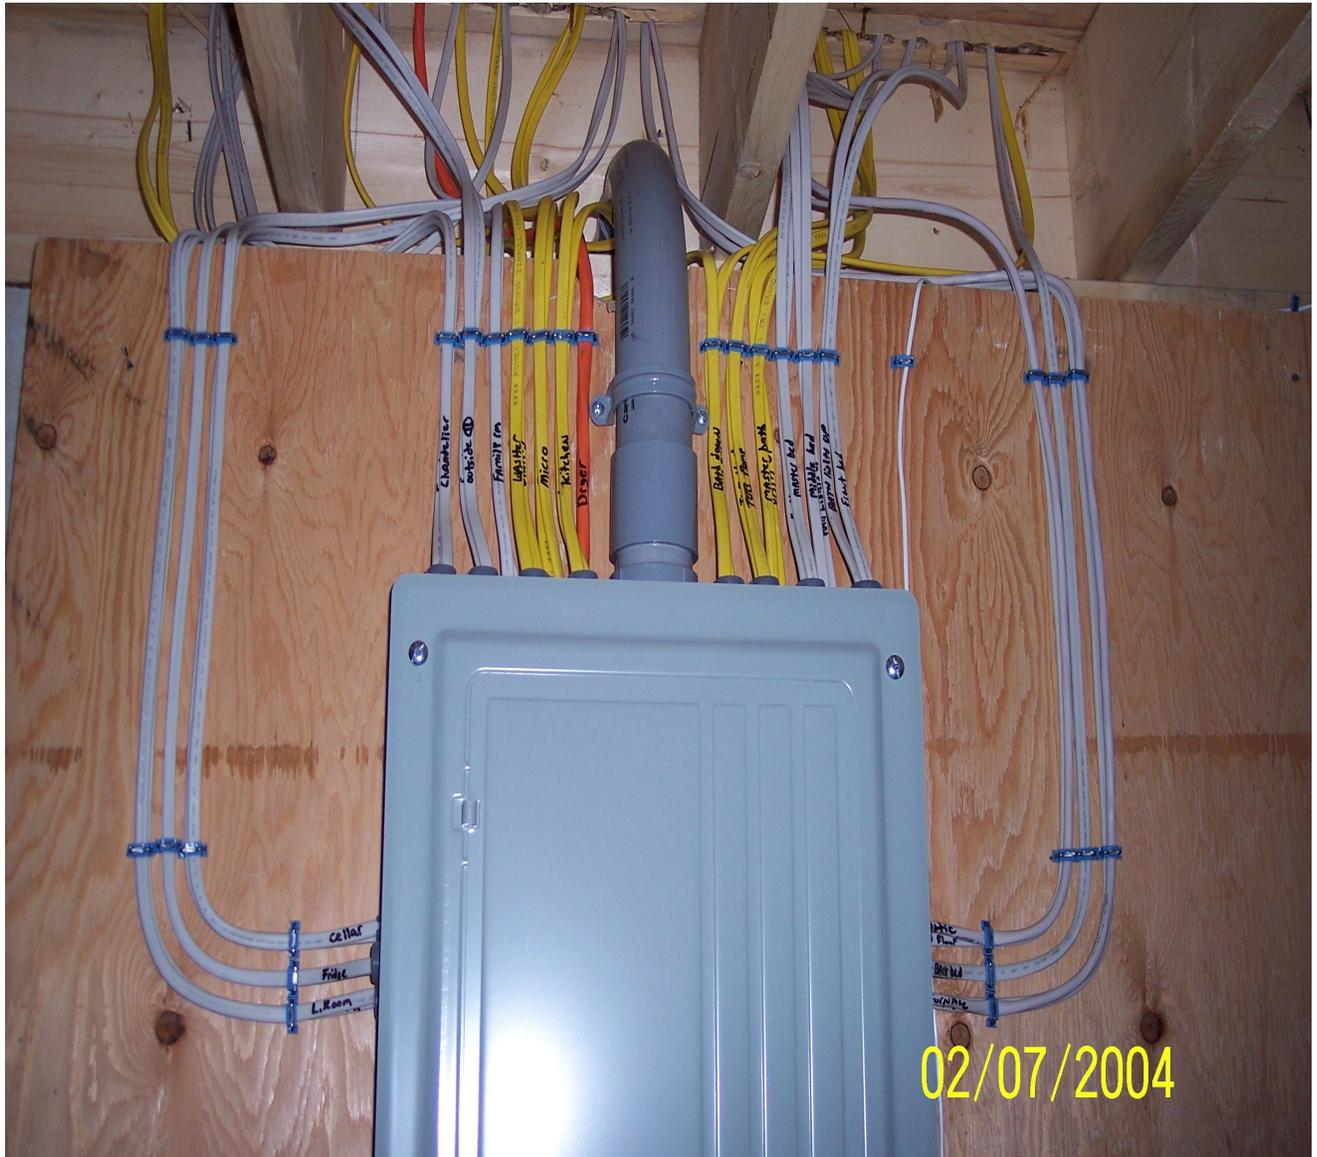

**Gas manifold for distribution
with shut-offs for each branch line**

Thom Roy—Fremont Building Inspector

Not a good situation!

Thom Roy—Fremont Building Inspector

Workmanship—Nicely done

Thom Roy—Fremont Building Inspector

Whoops?

Plates need to be supported with framing member—plates need to be continuous!

Thom Roy—Fremont Building Inspector

Not “preferred” method
for routing and securing CSST

Protective sleeve is stripped back too far!

-Garages-
**Stairways require proper
handrails and guards**

**Take care of this *before*
you call for inspection**

**Foundation
Sealed, stone & pipe drainage
with protective fabric**
